Center Rope at top overlapped stitched

Ultra Plus Baseball Netting

Ultra Plus is a high performance netting developed for baseball customers. It is manufactured from the highest quality polyethylene yarn along with specialized treatment.

®

Features :

High resistance to UV degradation when used outdoors

Excellent abrasion resistance when compared to other PE and Nylon netting in dry and wet conditions

Superior feel & appearance due to the special treatment - It will not peel off or have a sticky feel

The coverage of netting is more as compared to Nylon, i.e., higher metres per kg
It has been tested through extensive field trials in varied climatic conditions

BASEBALL

Baseball Backstop Netting

GTFL provides Baseball Backstop netting in HDPE and Nylon.

We also offer Plateena Netting Which is made up of Dyneema® Yarn (the strongest synthetic fiber available)

Features :

Light weight and easy to install

Good visibility due to thinner twine diameter

Tested and Approved as per standards

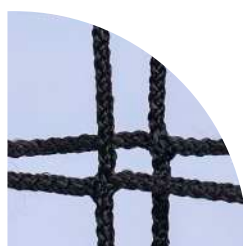

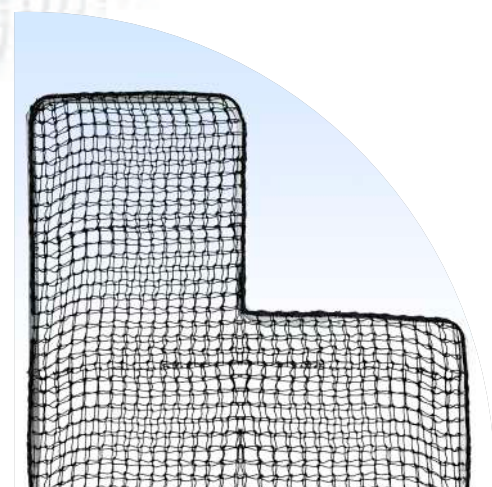

Water Resistant hence does not sag in outdoor moist conditions

Higher stability of the structure as the thinner twine size offers very less resistance to wind

Very High Strength to Weight Ratio as compared to nylon or HDPE nets

Baseball Practice Screens

We offer durable baseball practice screens. It can be used indoors as well as outdoors. It will be useful for teams, players as well as schools.

Features :

Light weight and easy to install
Water and weatherproof
UV treated for longer life and colour stability in outdoor use
Tailormade and customized as per requirements

SAFETY/PROTECTION

SAFETY/PROTECTION

Safety Netting

We manufacture safety nets for use on construction/infrastructure projects. They serve a dual purpose - arrest fall of personnel working at height on construction projects, and at the same time prevent debris or any other object from falling from a height.

Features :

- No Knot Slippages
- Heat Set that gives a better dimensional stability
- UV Stabilized resulting in better durability against exposure to Sunlight
- Test Report with State of the art testing facilities

Specifications

- Made from PPMF/Nylon/HDPE Twine
- Mesh Size: 100mmsq /60 mmsq/ as per the requirement
- Machine made nets
- Dimensions- As per the requirement

Types

- Triple Layered Safety Nets - Fall Arrest and Debris Arrest
(Three different layers of netting combined together to provide triple safety for high rise construction sites)
- PPMF Knotless Safety Nets - Human Fall Arrest
(Certified as per EN 1263 -1 :2002 Certification- Nets can be supplied with complete fabrication and handling/ mounting instructions as per applicable standards)

Class	Energy Absorption Capacity (KJ)	Mesh Size (mm)
A1	2.3	60
A2	2.3	100
B1	4.4	60
B2	4.4	100

- Safety net with containment nets - Debris Arrest
(These nets can be used on construction sites for debris arrest)
- Nylon Knotted Safety Nets - Various Safety Applications
(These are UV stabilized high strength nylon nets used in material handling, bay nets, amusement parks, theatres and various other applications)

SAFETY/PROTECTION

Gangway Netting

We offer high quality Gangway netting that provides superior safety and protection. It is firm and impact resistant.

Features :

Uniform mesh size provides firmness

UV stabilized to enhance life

Firm Fabrication leading to proper secured splicing or lashing at corners

Resists high impact

Customization Options :

Available in various sizes as per customer requirement

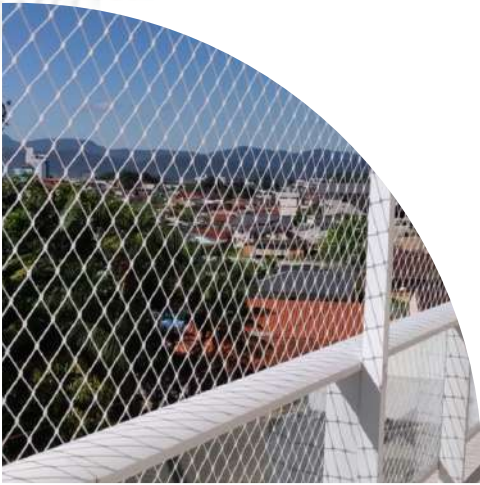

Specifications

Material	Type	Twine Dia (mm)	Mesh Size Square Mesh (mm)	Dimensions	Colour
