Global firms pick India for digital services: Nasscom

ASHUTOSH MISHRA
New Delhi, 15 April

India continues to be the preferred destination for global businesses aiming to build and expand their digital services portfolio, according to a recent study by industry body Nasscom in partnership with Avasant.

Customs should not hold up exports due to valuation issues

CHATROOM

T N C RAJAGOPALAN

We are an EOU. We cleared the goods manufactured by us into DTA after reversing the BCD and SWS. Now, the DTA party has rejected the goods. How can we square the transactions and get back the BCD and SWS paid to the government? Under what documents should the DTA party return the goods? Firstly, you can give a credit note to the DTA party and square the transaction. Next, the DTA party can send back the rejected goods under a

delivery challan. Third, you can receive the goods and treat the inputs on the goods as duty paid, so that when you reprocess or repair the rejected goods and supply again to the same or another party in DTA, you need not pay any BCD or SWS. Of course, if you export the repaired or reprocessed goods, you can claim drawback of the BCD and SWS paid on the inputs through brand rate.

We got our advance authorisation invalidated for direct imports and got an invalidation letter issued in favour of the intermediate supplier. For some reason, that supplier has defaulted and we have not received the goods from him. We don't know whether an advance authorisation for intermediate supplies against the invalidation letter was issued and if so, whether it was utilised and if so, to what extent. Now, is there any

provision whereby we can get the credit back in the advance authorisation so that we can use that amount to make direct imports?

I don't find any provision for such an eventuality. I suggest you approach the policy relaxation committee at the DGFT HQ. You can plead that even if an advance authorisation has been issued against the invalidation letter and it has been utilised, the failure to supply you the intermediates can result in recovery of the duty on the inputs imported by the intermediate supplier and so, giving the re-credit in your advance authorisation need not result in any loss for the government. You may also offer to give an affidavit regarding non-receipt of intermediates from the supplier and indemnify the government against any losses. Of course, your advance authorisation should be valid for re-credit.

We do not have an IEC. We want to export samples to a foreign party who is interested in our goods. If he approves the samples, he will place the order. We know that to export or import, we need an IEC. Do we need an IEC even for sending samples?

Para 2.07 of HBP gives the list of categories exempted from IEC number. Export of samples is not covered there.

The Customs have held up our export consignment because our export price is nearly twice the price our purchase price. How to convince the Customs to allow export of the goods and investigate later? You can refer the Customs to CBEC Circular no.37/2007-Cus dated 9th October 2007. It says that export consignments should not be held up for valuation enquiries/ investigations.

Exports...

The commerce secretary said that sectors such as electronic goods, drugs, and pharmaceuticals had done well despite adversities. Even though exports contracted in March, their value in the month was the highest in FY24. According to the data, the trade deficit in March fell to an 11-month low of \$15.6 billion because imports declined at a faster pace than exports did. On a cumulative basis, the trade deficit narrowed from \$265 billion in FY23 to \$240 billion in FY24.

In March, India imported goods worth \$57.28 billion, down nearly 6 per cent mainly on the back of lower imports of items such as coal, petroleum products, gold, and fertilisers. On a cumulative basis, growth

lower oil imports, which went down 14.1 per cent, supported by reduced oil prices.

Aditi Nayar, chief economist and head of research and outreach, ICRA, said led by a larger Y-o-Y decline in merchandise imports vis-à-vis such exports, India's merchandise trade deficit eased to an 11-month low in March, while also trailing the levels seen in the year-ago month, amid a halving of gold imports and a fall in non-oil non-gold imports.

Services exports saw a 6.25 per cent contraction at \$28.54 billion in March, while that of imports saw 6.57 per cent decline to \$15.84 billion, resulting in a surplus of \$12.69 billion. The services trade data for January, however, is an "estimate", which will be revised based on the Reserve Bank of India's subsequent release.

India's overall exports -- goods and services -- saw only 0.04 per cent growth at \$76.68 billion in FY24.

FIAO President Ashwani Kumar said the tensions in West Asia, especially the threat for consignments routing through Red Sea, had added to the woes of the exporting community, because the freight rates, along with the insurance cost, had gone up "unimaginably high", with the burden of various surcharge.

Much will depend on the new contracts to be signed with buyers in the new financial year because the exporters have been absorbing the burden of increased freight cost in accordance with the old agreement.

West Asia...

FPIs sold shares worth ₹3,268 crore, while domestic institutional investors pumped in nearly ₹4,800 crore.

Over the weekend, Iran launched an unprecedented attack on Israel in response to the country's involvement in a strike at the Iranian consulate in Damascus. However, most of the missiles were intercepted by the Israeli military.

The markets in the West gained amid hopes that the flare-up between Iran and Israel would now calm down. The S&P 500 was in the green in early trade on Monday.

Brent crude, too, eased below \$90 a barrel amid signs

of both sides avoiding further escalation of tensions.

Gold swung between gains and losses in the international market but traded below \$2,400/ounce. At Zaveri Bazaar in Mumbai, standard gold traded slightly lower at ₹72,521 per 10 grams on Monday versus ₹72,881 on Friday.

Many remain hopeful that further flare-up is unlikely after the Iranian mission to the United Nations said the issue can be considered concluded. Moreover, the US and other nations have also asked Israel to maintain restraint.

IMD...

This is the first time since 2016 that IMD, in its first forecast, has predicted 'above-normal' rains. An El Niño, expected to turn neutral by the time the monsoon season sets in June and then gradually move towards La Niña, a positive Indian Ocean Dipole, and below-normal snow cover in the Northern Hemisphere from January to March will all combine to give India a good monsoon, according to IMD.

In 2023, the southwest monsoon was 'below normal' due to the effect of El Niño, the first time in the preceding four years. The Met department said that almost 75-80 per cent of the country's landmass is expected to receive normal monsoon this year except for some areas in the extreme Northwest (hills of Jammu & Kashmir and Uttarakhand), East, and Northeast India (such as some parts of Assam, Odisha, and Gangetic West Bengal) where monsoon rains might be below normal.

"This usually happens in 'above-normal' monsoon years when parts of East and Northeast India receive 'below-normal' rains," IMD Director-General Mrutyunjay Mohapatra told reporters in a briefing on Monday. Probability-wise, the Met department said that there is a 31 per cent chance of the 2024 southwest monsoon being 'above normal,' 30 per cent chance of it being 'excess,' 29 per cent chance of the rains being 'normal,' and just a 2 per cent chance of them being deficient.
