

## Garware Wall Ropes captures new heights in the geo-synthetics sector

**Pune :** Garware-Wall Ropes Ltd. (GWRL), one of India's leading players in the technical textiles sector and a pioneer in the geo-synthetics space has been honored with the prestigious 'Institutional Award for R&D Works' by Central Board of Irrigation & Power (CBIP) for its unmatched contribution to the geo-synthetics sector.

The company is set to receive the honor at an international seminar - "Geosynthetics – The Road Ahead" organised in New Delhi by CBIP and Indian Chapter of IGS. During the occasion, CBIP will be honoring the Institutions and Individuals for their contribution for the development and promotion

of uses of geosynthetics in the country.

The company has developed and commercialized more than 20 products and solutions in the geo-synthetic segment and has successfully undertaken more than 150 projects for clients across diverse Clients such as Konkan Railway Corporation Limited (KRCL), Hindustan Zinc, Chennai Airport, Nabha Power Limited among others. Mr. T. Kulkarni – Vice President, GEO Division, said, "Our R & D teams work closely with our stakeholders in developing and successfully deploying various applications across sectors of civil engineering, aquaculture, agricul-

ture and sports among others. We continuously strive to develop and integrate new and germane product technologies offering the best-in-class value proposition to our customers. Our phased involvement right from manufacturing to execution for various projects undertaken has translated well and helped us enrich our domain expertise."

"We are extremely bullish on the segment and the recognition of our efforts comes in at a very crucial time. We are grateful to CBIP and Indian Chapter of IGS for appreciating our efforts and we expect to sustain the momentum while exploring potential growth opportunities," he further added.
